Professional Summary

Junior Software Engineer with hands-on experience in **full-stack web development, backend API optimization, and AI-powered automation tools**. Skilled in building **Next.js, Node.js, and MongoDB** applications with **secure RESTful APIs**, responsive UI/UX, and scalable architecture. Strong foundation in **Python, Java, and machine learning frameworks** such as TensorFlow and Pandas. Proven ability to collaborate in **agile teams**, enhance system performance, and deliver production-ready software.

Technologies

Programming Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL

Frontend Development: HTML5, CSS3, Bootstrap, TailwindCSS, React.js, Next.js

Backend Development: Node.js, Express.js, RESTful API Design Databases: MongoDB, MySQL

Machine Learning : TensorFlow, NumPy, Pandas, Matplotlib

Tools And Platforms : Git, GitHub, Postman, Figma, Oracle Cloud (OCI), VS Code

Experience

Junior Software Engineer Intern, Al Alpha Tech, Nashik October 2024 – Sept 2025

- Optimized backend APIs using Node.js and Express, reducing response time by 30% through routing improvements and code refactoring.
- Built and deployed **Chairman**, a full-stack society management platform with Next.js frontend, Node.js/Express APIs, MongoDB, and JWT authentication.
- Designed user-friendly UI/UX from scratch, digitizing manual workflows for society management.
- Developed and tested RESTful APIs with **Jest**, ensuring production-level reliability.
- Contributed to agile sprint planning, stand-ups, and version control via Git & GitHub.
- Created a prototype entertainment app inspired by YouTube, emphasizing intuitive UI and smooth media browsing.

Projects

Chairman App – Society Management Platform

- Developed a full-stack web app for society management with Next.js, Node.js/Express, and MongoDB.
- Built JWT-secured authentication and role-based dashboards for members and chairpersons.
- Designed dynamic society structure generation (wings, floors, flats) and finance tracking modules.

Machine Learning – Movie Recommendation System

- Developed a recommendation engine using collaborative filtering and content-based algorithms.
- Predicted user movie preferences with 82% accuracy using similarity metrics and model tuning.
- Visualized performance and feature relationships with Matplotlib and Seaborn.
- **Tools Used:** Python, Scikit-learn, Pandas, NumPy, Matplotlib,

Terminal-Based Stock Tracker

- Created a Python terminal application that uses Yahoo Finance API for real-time stock tracking.
- Integrated interactive charts using Plotly for historical price analysis and visualization.
- **Tools Used:** Python, Plotly, Yahoo Finance API

Education

Ajinkya D. Y. Patil School of MCA, Pune

In Progress

Master of Computer Application (MCA)

Ashoka Center for Business and Computer Studies, Nashik

GPA: 8.23 / 10

Bachelor of Computer Application (BCA)
